SUMMARY

Full-stack software engineer with 2+ years of production experience building and shipping web applications end to end — Angular frontends, .NET APIs, and Azure cloud infrastructure. Currently specializing in AI tooling: MCP servers, LLM orchestration services, and developer productivity systems. Strong background in authentication (OAuth 2.0 / OIDC) and compliance (VAPT, GDPR, ISO).

EXPERIENCE

Software Engineer (Full-Stack)

Jun 2025 – Present

Unlock Future Private Limited

- Designed and built a multi-provider LLM orchestration service (Azure OpenAI, GCP Vertex AI, Anthropic Claude) behind a unified streaming API, with configurable system-instruction layers for agentic workflows.
- Built an internal MCP (Model Context Protocol) server that gives AI coding assistants full MSSQL schema context on demand — adopted across the engineering team, eliminating manual schema copy-pasting.
- Independently replicated a production AI assistant: containerized code execution sandbox, multi-turn chat summarization, deferred connector system, and multi-provider LLM integration.
- Owned authentication across multiple production apps: JWT lifecycle, refresh-token rotation, Google SSO, Microsoft SSO, and Role-Based Access Control (RBAC) in .NET + Angular.
- Sole owner of Azure deployments across 3 products — App Services, Azure SQL, Storage Accounts, SAS URL generation, and Azure Maps.
- Managed Cloudflare DNS, domain configuration, and CDN setup; owned the full deployment lifecycle from staging to production.

Associate Software Developer

Jun 2024 – Jun 2025

Unlock Future Private Limited

- Built and maintained .NET Web APIs and Angular features across multiple production apps, owning features end-to-end.
- Coordinated with external VAPT security firms; remediated all reported vulnerabilities and completed GDPR and ISO compliance audits on the technical side.
- Optimized Angular frontend performance: reduced bundle size, resolved change-detection bottlenecks, improved Core Web Vitals.
- Integrated Azure Blob Storage and GCP services into backend pipelines; designed Azure SQL schemas for production applications.

Software Developer Intern

Nov 2023 – May 2024

Unlock Future Private Limited

- Contributed to ASP.NET Web API and Angular projects; built features end-to-end and learned production CI/CD, code review, and release management.

PROJECTS

MSSQL MCP Server | TypeScript · Node.js · MCP Protocol · MSSQL

2024

- Internal MCP server connecting AI coding assistants to MSSQL databases for real-time schema context (tables, columns, relationships, stored procedures). Adopted across the engineering team.

AI Assistant Platform | Angular · .NET · Azure · Docker

2024

- Built a fully functional AI assistant from scratch: containerized code execution, multi-turn chat summarization, deferred connector system for external service integrations, and multi-LLM support.

- Personal portfolio deployed on Cloudflare Pages via OpenNext adapter. Features dynamic OG image generation, automated sitemap/robots.txt, dark/light theming, and this LaTeX-driven resume pipeline.

SKILLS

Frontend	Angular, TypeScript, RxJS, JavaScript, Next.js, Performance Optimization
Backend	.NET / C#, ASP.NET, Node.js, Python, REST APIs
AI Tooling	MCP Protocol, Azure OpenAI, GCP Vertex AI, Anthropic Claude, LLM Orchestration, Agentic Workflows
Cloud	Azure App Services, Azure SQL, Azure Blob, Azure Maps, GCP, Cloudflare Pages, Docker
Auth	OAuth 2.0, OpenID Connect, Refresh Token Rotation, Google/Microsoft SSO, RBAC
Databases	MSSQL, PostgreSQL, MySQL
Compliance	VAPT Remediation, GDPR, ISO, SOC

EDUCATION

M.Sc. Computer Science	2022 – 2024
Savitribai Phule Pune University (SPPU)	
B.Sc. Computer Science	2019 – 2022
Savitribai Phule Pune University (SPPU)
