SUMMARY

Results-driven Full-stack Developer with over 2.5 years of experience building secure, high-performance web applications using the .NET and Angular ecosystems. Proven expertise in developing AI orchestration pipelines, implementing resilient JWT/refresh-token authentication systems, and executing security remediations for ISO, VAPT, and SOC2 compliance audits.

EXPERIENCE

Unlock Future Private Limited

Pune, India

Software Engineer (Full-Stack) (Full-time)

Jun 2025 — Present

- Designed and built a multi-provider LLM orchestration service (Azure OpenAI, GCP Vertex AI, Anthropic Claude) behind a unified streaming API, with configurable system-instruction layers for agentic workflows.
- Integrated Model Context Protocol (MCP) tooling into the development workflow, enabling AI coding assistants to query MSSQL database schema context on demand — eliminating manual copy-pasting of schema information.
- Built internal developer tooling plugins using Cursor and Claude Code to accelerate team productivity; independently replicated a Claude-like AI assistant with containerized code execution, chat summarization, and deferred connector handling.
- Owned authentication and authorization across multiple production applications (.NET + Angular), including JWT lifecycle management, refresh-token rotation, Google/Microsoft SSO, and Role-Based Access Control (RBAC).
- Sole owner of Azure deployments across 3 products — App Services, Azure SQL, Storage Accounts, SAS URL generation, and Azure Maps integration.
- Managed Cloudflare DNS, domain configuration, and CDN setup for all live products; handled end-to-end deployment lifecycle from staging to production.

Associate Software Developer (Full-time)

Jun 2024 — Jun 2025

- Built and maintained .NET Web APIs and Angular features across multiple production apps, owning features end-to-end from design to deployment.
- Coordinated with external VAPT security firms and remediated all reported vulnerabilities; involved in GDPR and ISO compliance audits on the technical side.
- Optimized Angular frontend performance — reduced bundle size, addressed change-detection bottlenecks, and improved Core Web Vitals scores.
- Integrated Azure Blob Storage and GCP services into backend pipelines; designed Azure SQL schemas for production applications.

Software Developer Intern (Internship)

Nov 2023 — May 2024

- Contributed to ASP.NET Web API and Angular projects; built features end-to-end and learned production CI/CD, code review, and release management practices.

SKILLS

FRONTEND	Angular, TypeScript, RxJS, JavaScript, Next.js, Performance Optimization, Lazy Loading, Caching
BACKEND	.NET / C#, ASP.NET, Node.js, Python, REST APIs
AI TOOLING	MCP Protocol, Azure OpenAI, GCP Vertex AI, Anthropic Claude, Agentic Workflows, Streaming, Prompt Engineering
CLOUD & INFRA	Azure App Services, Azure SQL, Azure Blob, Azure Maps, GCP, Cloudflare Pages, Docker, CI/CD
AUTH & SEC	OAuth 2.0, OpenID Connect, Refresh Token Rotation, Google/Microsoft SSO, RBAC, VAPT Remediation, GDPR, ISO/SOC
DATABASES	MSSQL, PostgreSQL, MySQL

EDUCATION

M.Sc. in Computer Science

Oct 2022 — May 2024

Sir Parashurambhau College, Pune

Focus on advanced computing architectures, database systems, and software engineering.

B.Sc. in Computer Science

Jul 2019 — Sep 2022

Savitribai Phule Pune University

First Class with A+. Groundwork in algorithm design, data structures, and web development technologies.

PROJECTS

MSSQL MCP Server

2024

An internal MCP server connecting AI coding assistants to MSSQL databases for real-time schema context (tables, columns, relationships, stored procedures). Adopted across the engineering team.

TypeScript · Node.js · MCP Protocol · MSSQL

AI Assistant Platform

2024

Built a fully functional AI assistant from scratch: containerized code execution, multi-turn chat summarization, deferred connector system for external service integrations, and multi-LLM support.

Angular · .NET · Azure · Docker

yogeshcrafts.in — Portfolio

2025

Personal portfolio deployed on Cloudflare Pages via OpenNext adapter. Features dynamic OG image generation, automated sitemap/robots.txt, dark/light theming, and this LaTeX-driven resume pipeline.

Next.js 16 · TypeScript · Cloudflare Workers · OpenNext

AWARDS & ACHIEVEMENTS

Rank 1 — Intercollegiate Electronics Competition

2019

Awarded for designing and demonstrating hardware integration systems.

CERTIFICATIONS

Currently preparing for Microsoft Certified Azure AI Engineer Associate credentials. Updates pending.
